

OUR STATEMENT

Jordi Construct is committed to environmentally responsible behaviours and practices in all aspects of its operations to minimise our impact on the environment, to the extent to which we can control.

OUR MISSION

To achieve this, our team aims to:

- Ensure that environmental considerations form part of our planning and decision-making processes throughout business operations and projects, from inception to completion, to identify, prevent and mitigate undesirable environmental impacts.
- Promote and foster a culture of responsibility for care of our environment and environmentally friendly solutions amongst our team, clients, subcontractors, and suppliers.
- Encourage our team, subcontractors, and suppliers to “reduce, re-use and recycle” wherever possible at our project sites and offices.
- Conduct all operations and projects in compliance with all relevant statutory obligations, codes, standards, and contractual requirements.
- Define how the management of the environment will be managed, reported and performance evaluated on each project and actively promote positive outcomes.
- Ensure monitoring and review of our environmental performance and impact of our works, in parallel with our reflection of learnings from historical challenges, to effectively evaluate mechanisms for enhancing our continual improvement.
- Continually review and improve our processes and procedures for environmental management in accordance with AS/NZS ISO 14001.

To ensure these objectives are met Jordi Construct has an environmental management system that complies with AS/NSZ ISO 14001, and Jordi Construct Management are committed to the implementation and ongoing maintenance of this system and in turn expects every employee to contribute to and support it. The Jordi Construct team are aware of these objectives and strive to achieve them.

This system provides all interested parties with the assurance that Jordi Construct’s operations and projects will be undertaken with every consideration given to a positive environmental impact.

The Environmental Management System and Environmental Management Policy will be reviewed and updated annually as part of Jordi Construct’s commitment to develop and continually improve the processes and procedures of our business.
